

AN E-COMMERCE BRAND

The Frictionless Storefront.

Research Theme: A blueprint for e-commerce optimization

Audience: Potential customers & users confused about the general layout and checkout process.

Action: Merging cognitive psychology, information architecture and UX strategy to drive revenue.

THE ENEMY IS FRICTION.

The invisible revenue tax

Core Concept: Friction is the gap between customer intent and site capability. It is the invisible resistance that turns a smooth journey into a slog.

Insights:

- 1. Revenue Tax:** Every extra second or unnecessary form filled directly reduces conversion.
- 2. The 5 Seconds Test:** If a stranger cannot identify what you will sell or how to buy it within 5 seconds the friction is too high.
- 3. Cognitive Cost:** High cognitive load and decision fatigue lower satisfaction and decision

INFORMATION ARCHITECTURE

Simplified IA

- HOME**

Critical Purchase Path
The most important branch of the IA is visually emphasized:
Home → Shop → Product Listing → Product Details → Add to Cart → Cart → Checkout → Order Confirmation

Core IA principle: Users should always know where they are, what they can do, and what comes next.

Primary User Flow

WIREFRAME

Problem: Users are abandoning the shopping journey because the experience feels cluttered, unclear, and difficult to navigate.

Design Goal: Create a simple homepage skeleton that helps users quickly understand:

What is being sold → Where to browse → How to select a product → How to purchase.

Homepage

- 01****Simplified navigation:** Limits top-level choices while keeping Search and Cart immediately accessible.
- 02****Clear value proposition:** Communicates what the store offers before asking the user to browse.
Primary CTA: "Shop Now" provides one obvious entry into the purchase journey.
- 03****Category shorthand:** Supports users who want to browse without knowing an exact product.
- 04****Best sellers:** Surfaces high-interest products early and reduces discovery effort.
- 05****About the brand:** Displays relevant info about the brand and builds trust.
- 06****Trust signals:** Addresses common purchase concerns before checkout.
- 07****Secondary discovery path:** Featured collection encourages continued exploration without competing with the primary hero CTA.
- 08****Utility navigation:** Lower-priority information is moved to the footer to reduce header clutter.
